

It has become clear to me as a United States citizen that Sinclair Broadcasting is abusing the public trust. Their abhorrent attempt to sway a presidential election by airing a questionable documentary about one of the candidates is an obvious misuse of the public airways. I am sure that it disregards several FCC regulations and I will expect the FCC to investigate and penalize the infractions. We, the people of the United States put our trust in the FCC to monitor any abuse of the public airways. I personally will expect to hear that the FCC has begun an investigation in to this gross disregard for the public trust. Thank you.
